Part 1:

The date and time at which you already completed this demo

Nov 23 2020 20:00-20:20

Briefly describe any challenges that arose during the demo:

1. Streamers need to reload the page to see their streaming (sometimes it happens perhaps because the streaming is being digested by the pipeline, and it cannot respond immediately. Or because our video player is not properly configured).
2. Users have access to their user id, which is a security concern.
3. Statistical graphs need a lot of data to show its value, however we do not have such a large number of users.

Part 2:

A link to the github repository where your entire codebase resides. Tag which file revisions were shown in the demo.
